Snakes can use these to grip the ground to help them move.

Snakes use their other senses to hunt because these don't work very well.

Snakes do not have noses so they stick out this body part to smell.

This can be wiggled and used as bait to lure prey.

Camels have one or two and they are filled with fat.

Camels use these to stop sand blowing into their eyes.

This protects the camels skin from the sun.

Leathery skin on these parts help the camel kneel on the hot sand.
