

Feeding Time at the Zoo

I can find fractions of a set of objects.

Help the twins to work out how much food to give each animal. Put objects on fraction strips to help you.

Each rhino will get:

Strawberries

Apple

Banana

12

20

16

Each giraffe will get:

Strawberries

Apple

Banana

15

3

9

Each monkey will get:

Strawberries

Apple

Banana

14

18

16

Baby elephant gets $\frac{1}{4}$
and mum elephant gets $\frac{3}{4}$.

Apple for baby

Strawberries for baby

Banana for baby

Apple for mum

Strawberries for mum

Banana for mum

16

20

8

Challenge:

If baby elephant has 3 pears to eat, how many will mum have?

If each giraffe has 2 pears, how many will the twins need altogether to be able to feed all of them?

Draw pictures on the back of the sheet to show how you worked them out.
