

Array Hunt

An array is an arrangement of objects, numbers or pictures in columns or rows. The purpose of an array is to help children understand multiplication and division.

How to use Arrays

<https://www.bbc.co.uk/teach/class-clips-video/maths-ks1--ks2-how-to-use-arrays-to-multiply/zrks382>

Y2 Maths Everywhere – Array hunt

An array is an arrangement of objects into equal rows.
This array shows two rows of three ice-lollies.

Here are some mystery arrays. Can your child work out what the array is of?

Go on an array hunt around your home and allow your child to take photos of some arrays such as egg boxes, muffin trays, chocolate boxes or tiles in the bathroom.

Talk about how many rows there are and how many in each row.
How many altogether?

$3 + 3 = 6$

Can you draw some arrays for the following numbers using dots.

24 15 36 28 16 30

Remember not to make the dots too small... or too big!!

The best arrays are nice and clear, so that it makes counting easy and quick!

There are some templates for you to draw your arrays carefully 😊
